Pallet type	EPAL
Pallet size (mm)	1200x800x930 (LxIxh)
Pallet weight (kg)	560
Pallet/trailer	33

Hydro-alcoholic solution in compliance with the order of 13. March 2020 of the French Ministry of Ecological and Solidarity Transition, authorising by way of derogation the placing on the market and the temporary use of certain hydro-alcoholic products used as biocides disinfectants for human hygiene. Professional use. Food packaging: risk of confusion.

In accordance with the formulation and recommendations of the World Health Organization and the French ministerial orders in force, the solution does not contain any perfume: the predominant odour is the smell of alcohol, which is the majority component (80% V/V). The ethanol used is vegetable-based bioethanol. This smell disappears in a few minutes after application on the hands.
